PROVA

The ultimate waterproofing system 

Welcome to the world of ProVa®- This system features all of the components required to build a fully bonded water tight assembly for maintenance-free tiled showers. Our complete line of ProVa® products protect wall cavities against water and vapor penetration and prevent mold and mildew build-up over years of use. The pre-fabricated sloped pan eliminates the mortar bed and reduces the overall weight and installation time. Step into an unfinished shower with ProVa® and watch how this revolutionary line of products transforms the installation process. The design possibilities are limited only by the imagination!

Loxcreen is proud to present the latest addition to our ProVa® family. The ProVa® Shower System line now includes a new 32"x 60" center drain application kit.

As with all other shower kits, this new size also includes the following components:

- ✓ Curb
- ✓ Pipe Seal
- ✓ Pre-Formed Corners

Included in this package are the individual kit components, part numbers, descriptions and product attributes. For inquiries or to place an order please contact our Customer Service Department.
