Press Release

Loxcreen Flooring Group: ProVa-Drain “Product Improvement”

In today's competitive market, continuous improvement is a must. We have changed the bonding surface on the ProVa-Drain from a membrane with a scrim to our new ProVa Bond surface treatment. This new surface treatment is being applied to both the top and bottom of the drain body to enhance the bond between mortar and drain. The scrim has been removed from the top surface of the drain and the ProVa-Bond surface treatment will be applied. ProVa-Bond is proven to provide better adhesion between drain, mortar and pan and provides a waterproof, strong and reliable bond. Not only does ProVa-Bond provide superior adhesion with the surrounding materials, but the entire top surface is coated. By coating the entire surface, we insure that we have complete bonding. PROVA-SHOWER SYSTEMS is the only product in the market that is offering this surface treatment application.
